Jewellery ... “surfs” on the wave of innovation:

**VICENZAORO September will mark the arrival of the new T. Evolution - Jewellery
Machinery & Technology project**

Vicenza – August, 1st. **T. Evolution** will be making its debut at VICENZAORO, the European Show specifically for international Gold and Jewellery, organized by IEG – Italian Exhibition Group, scheduled to take place in Vicenza from 22nd to 26th September.

In an ad hoc section inside the Vicenza Exhibition Centre, a new project dedicated to machinery and technology for gold and jewellery processing is about to be created that specifically focuses on technologies and digital methods which are becoming increasingly part of the jewellery-making process.

Jewellery engineering, 3D printing and new digital technologies are, in fact, infiltrating the entire sector, flanking both artisan and industrial manufacturing with new creative and productive models.

The development of 3D printing in jewellery production, lost wax casting, laser cutting systems, software for 3D design in jewellery production, the new plugin for Rhinoceros 6.0: these are the sector's current and most pressing topics that are opening up prospects for the jewellery world.

T.Evolution will be offering a full **programme of workshops and specific technical seminars** on these themes, starting from the Product Manager of RhinoGold and Matrix, the parent company of the most used software in 3D technology.

With T.Evolution, VICENZAORO will not only be dedicating space to the most advanced end of the industry's innovation, it will also be supporting exhibitors' and sector operators' enormous demand for **a greater continuity during the year for the T.Gold Show**, a world leader in the machinery sector, scheduled every year as part of the January edition of VICENZAORO.

Exhibiting at T.Evolution September 2018 will be leading technology, machinery and jewellery processing suppliers in the field of digital technologies.

Thanks to profitable collaboration with the **Technical Partner CPV - Centro Produttività Veneto**, every edition of T.Evolution will deal with a specific theme of particular interest and usefulness for sector operators.

Exhibiting companies such as **FOV by Legor Group S.p.A, 3 DZ, DWS, and PCube**, to mention just a few, will be offering sector operators their printers, software and cutting edge professional 3D machinery.

FOCUS ON ITALIAN EXHIBITION GROUP SPA:

Italian Exhibition Group (IEG), with structures in Rimini and Vicenza, is leader in Italy for organized trade fairs and among the main European operators in the exhibition and congress sector. IEG Group specializes in organizing events in five categories: Food & Beverage; Jewellery & Fashion; Tourism, Hospitality and Lifestyle; Wellness and Leisure; Green & Technology. In recent years, IEG has embarked on an important path of expansion abroad, also through the establishing of joint ventures with local operators (for example in the USA, United Arab Emirates and in China). IEG closed the 2017 financial reports with total consolidated revenues of 130.7 million euro, an EBITDA of 23.2 million and a consolidated net profit of 9.2 million. In 2017, IEG, in the exhibition and congress venues of Rimini and Vicenza, totaled 50 organized or hosted events and 206 congress events. <https://en.iegexpo.it/>
